

**PERBANDINGAN MODEL PEMBELAJARAN *TALKING STICK* DAN
SNOWBALL THROWING TERHADAP HASIL BELAJAR IPS PADA
SISWA KELAS IV SD FREE METHODIST-2 MEDAN TAHUN
PELAJARAN 2022/2023.**

ABSTRAK

Tujuan penelitian ini adalah untuk mengetahui hasil belajar siswa menggunakan model pembelajaran *Talking Stick* pada mata pelajaran IPS kelas IV SD Free Methodist 2 Medan Tahun pelajaran 2022/2023, untuk mengetahui hasil belajar siswa menggunakan model pembelajaran *Snowball Throwing* pada mata pelajaran IPS kelas IV SD Free Methodist 2 Medan Tahun pelajaran 2022/2023, dan untuk mengetahui hasil belajar siswa menggunakan model pembelajaran *Talking Stick* dan model pembelajaran *Snowball Throwing* pada mata pelajaran IPS kelas IV SD Free Methodist 2 Medan Tahun pelajaran 2022/2023. Jenis penelitian ini adalah penelitian kuantitatif dengan menggunakan metode penelitian eksperimen semu atau *quasi* eksperimen. Berdasarkan perhitungan rata-rata tes akhir siswa diperoleh rata-rata hasil belajar di kelas IV C menggunakan model pembelajaran *Talking Stick* 78,75 dan rata-rata hasil belajar di kelas IV B menggunakan model pembelajaran *Snowball Throwing* 72,30. Hasil uji hipotesis dengan uji t dengan taraf signifikan $\alpha = 0,05$ sehingga diperoleh bahwa ada perbedaan hasil belajar siswa kelas IV C yang menggunakan model pembelajaran *Talking Stick* dan siswa kelas IV B yang menggunakan model pembelajaran *Snowball Throwing*. Hasil belajar siswa menggunakan model pembelajaran *Talking Stick* pada mata pelajaran IPS kelas IV SD Free Methodist 2 Medan Tahun Pelajaran 2022/2023 diperoleh nilai rata-rata 78,75, Hasil belajar siswa menggunakan model pembelajaran *Snowball Throwing* pada mata pelajaran IPS kelas IV SD Free Methodist 2 Medan Tahun Pelajaran 2022/2023 diperoleh nilai rata-rata 72,30 dan ada perbedaan hasil belajar siswa menggunakan model pembelajaran *Talking Stick* dan model pembelajaran *Snowball Throwing* terhadap hasil belajar siswa menggunakan model pembelajaran *Snowball Throwing* pada mata pelajaran IPS kelas IV SD Free Methodist 2 Medan Tahun Pelajaran 2022/2023, dikarenakan nilai mata pelajaran IPS dengan model pembelajaran *Talking Stick* lebih tinggi dibandingkan dengan menggunakan model pembelajaran *Snowball Throwing*.

Kata Kunci : Hasil Belajar Siswa, *Talking Stick*, *Snowball Throwing*.

**COMPARISON OF TALKING STICK AND SNOWBALL THROWING
LEARNING MODELS ON SOCIAL STUDIES LEARNING
OUTCOMES IN GRADE IV STUDENTS OF SD
FREE METHODIST-2 MEDAN FOR THE
2022/2023 ACADEMIC YEAR.**

ABSTRACT

The purpose of this study is to determine student learning outcomes using the Talking Stick learning model in grade IV social studies subjects of SD Free Methodist 2 Medan for the 2022/2023 academic year; to determine student learning outcomes using the Snowball Throwing learning model in grade IV social studies subjects of SD Free Methodist 2 Medan for the 2022/2023 academic year; and to find out student learning outcomes using the learning model Talking Stick and Snowball Throwing learning model in grade IV social studies subjects at SD Free Methodist 2 Medan for the 2022/2023 academic year. This type of research is quantitative research using pseudo-experimental or quasi-experimental research methods. Based on the calculation of the average final test, students obtained the average learning outcomes in class IV C using the Talking Stick learning model of 78.75 and the average learning outcomes in class IV B using the Snowball Throwing learning model of 72.30. The results of the hypothesis test were with a t-test with a significant level of $\alpha = 0.05$ so that it was obtained that there were differences in the learning outcomes of grade IV C students who used the Talking Stick learning model and grade IV B students who used the Snowball Throwing learning model. Student learning outcomes using the Talking Stick learning model in grade IV social studies subjects of SD Free Methodist 2 Medan for the 2022/2023 academic year obtained an average score of 78.75, student learning outcomes using the Snowball Throwing learning model in grade IV social studies subjects of SD Free Methodist 2 Medan for the 2022/2023 academic year obtained an average score of 72.30 and there were differences in student learning outcomes using the Talking Stick learning model and the Snowball Throwing learning model on student learning outcomes using the Snowball Throwing learning model in grade IV social studies subjects at SD Free Methodist 2 Medan for the 2022/2023 academic year because the value of social studies subjects with the Talking Stick learning model is higher than using the Snowball Throwing learning model.

Keywords: Student Learning Outcomes, Talking Stick, Snowball Throwing.
