Kartika Dewi Br Ginting. 1505030377. “Pengaruh Penggunaan Media Boneka Tangan Terhadap Kemampuan Menyimak Dongeng Pada Siswa Kelas II SD Negeri 101816 Pancur Batu Semester Genap T.A 2018/2019”. Skripsi: Program Studi Pendidikan Guru Sekolah Dasar. Fakultas Keguruan dan Ilmu Pendidikan. Universitas Quality Medan.

Penelitian ini bertujuan untuk mengetahui Pengaruh Penggunaan Media Boneka Tangan Terhadap Kemampuan Menyimak Dongeng Pada Siswa di Kelas II SD Negeri 101816 Pancur Batu Semester Genap Tahun Ajaran 2018/2019. Dengan populasi 50 siswa dan sampel kelas II-A 25 siswa dan kelas II-B 25 siswa.

Jenis penelitian ini adalah *quasi eksperimen* dengan rancangan pre-test post-test desain. Hasil pre test kedua sampel menunjukkan kemampuan awal kedua kelas sama sehingga dapat dilakukan perilaku yang berbeda yaitu kelas II-A sebagai kelas kontrol dan kelas II-B sebagai kelas eksperimen. Hasil analisis uji prasyarat ditemukan bahwa data post test kelas kontrol dan eksperimen telah memenuhi persyaratan analisis yaitu normalitas dan homogenitas. Hasil pengujian hipotesis ditemukan $\chi^2 = 14,62 > \chi_{\alpha}^2 = 5,99$. Dengan demikian H_0 ditolak dan H_1 diterima.

Berdasarkan pengujian hipotesis disimpulkan bahwa ada pengaruh penggunaan media boneka tangan terhadap kemampuan menyimak dongeng pada siswa kelas II SD Negeri 101816 Pancur Batu Semester Genap T/A 2018/2019.

Kata Kunci : Kemampuan Menyimak Dongeng dan Media Boneka Tangan

ABSTRACT

Kartika Dewi Br Ginting, 1505030377. "The Effect of Using Hand Puppet Media on the Ability to Listen to Tales in Class II Students of State Elementary School 101816 Pancur Batu Even Semester T.A 2018/2019". Thesis: Elementary School Teacher Education Study Program. Faculty of Teacher Training and Education. University of Quality Medan.

This study aims to determine the effect of the use of hand puppet media on the ability to listen to fairy tales for students in class II 101816 public elementary school Pancur Batu even semester 2018/2019 academic year. With a population of 50 students and samples of class II-A 25 students and class II-B 25 students.

This type of research is quasi-experimental with a pre-test post-test design. The results of the pre-test of the two samples showed that the initial abilities of both classes were the same so that different behaviors could be carried out namely class II-A as the control class and class II-B as the experimental class. The results of the prerequisite test analysis found that the post-test data of the control and experimental classes had met the requirements of analysis, namely normality and homogeneity. The results of testing the hypothesis found $\chi^2_{obs} = 14.62 > \chi^2_{table} = 2 = 5.99$. Thus H_0 is rejected and H_1 is accepted.

Based on hypothesis testing it was concluded that there was an influence of the use of hand puppet media on the ability to listen to fairy tales in class II students of SD Negeri 101816 Pancur Batu Even Semester T/A 2018/2019.

Keywords: Tale Listening Ability and Hand Puppet Media
