Based on the research results (t-test), self-service technology (X_1) has a significant effect on customer loyalty with a value of $T_{count} = 8,400 > T_{table} = 1.997$ and has a significance figure of $0.000 < 0.05$, service quality discipline (X_2) with a value of $T_{count} = 6,736 > T_{table} 1,997$ and has a significance figure of $0.000 < 0.05$. Simultaneously self service technology (X_1) and service quality (X_2) have a positive and significant effect on customer loyalty (Y), with an f-test value of F_{count} of $40,237 > F_{table}$ of 3.14 and a probability value of $0.000 < 0.05$.
