ABSTRACT

This study aims to determine the effect of the Manual Educational TV learning media on the learning outcomes of third grade elementary school students in the IPAS subject at UPT SD Negeri 060938 Kwala Bekala, Medan Johor, in the 2025/2026 academic year. The type of research used was a pre-experimental study with a One Group Pretest–Posttest Design. This research involved only one class with a total sample of 21 students. The research instrument was an objective test in the form of 5 essay questions at the C2 cognitive level. Data analysis techniques were carried out with the assistance of Microsoft Excel.

Based on the results of the research that has been conducted, it can be concluded that the Manual Educational TV media has a significant effect on the IPAS learning outcomes of third grade students at UPT SD Negeri 060938 Kwala Bekala, Medan Johor. This is based on the data obtained after the research was conducted, where the data analysis results showed that the average pretest score was 39.05, while the average posttest score was 80.24, indicating that student learning outcomes improved after the treatment was given.

Keywords: Learning outcomes, IPAS, Manual Educational TV Media.
