

**PENGARUH MODEL KOOPERATIF TIPE *TEAM GAMES TOURNAMENT* (TGT) BERBANTUAN MEDIA GAME EDUKASI TERHADAP HASIL BELAJAR SISWA MATA PELAJARAN IPAS MATERI TATA SURYA KELAS V DI UPT SPF SD NEGERI 101801 KEDAI DURIAN  
T. P 2025/2026**

**ABSTRAK**

Penelitian ini termasuk dalam jenis penelitian *pre-experimental* yang bertujuan untuk mengetahui pengaruh model pembelajaran kooperatif tipe *Team Games Tournament* (TGT) berbantuan media game edukasi terhadap hasil belajar siswa pada mata pelajaran IPAS materi Tata Surya kelas V UPT SPF SD Negeri 101801 Kedai Durian Tahun Pelajaran 2025/2026. Penelitian ini menggunakan desain *one group pretest-posttest design* dengan jumlah sampel sebanyak 32 siswa kelas V. Sebelum diberikan perlakuan, siswa terlebih dahulu diberikan pretest untuk mengetahui kemampuan awal. Selanjutnya siswa diberikan pembelajaran menggunakan model pembelajaran kooperatif tipe *Team Games Tournament* (TGT) berbantuan media game edukasi. Setelah perlakuan diberikan, siswa mengikuti posttest untuk mengetahui hasil belajar akhir. Berdasarkan hasil perlakuan yang diberikan, diperoleh rata-rata hasil belajar siswa sebelum perlakuan sebesar 58,31 dan meningkat menjadi 77,12 setelah perlakuan diberikan. Data hasil belajar dianalisis melalui uji normalitas sebagai prasyarat analisis. Hasil pengujian menunjukkan bahwa data berdistribusi normal, sehingga pengujian hipotesis dapat dilanjutkan menggunakan uji-t (*Paired Samples T-Test*). Hasil uji hipotesis menunjukkan adanya pengaruh yang signifikan model pembelajaran kooperatif tipe *Team Games Tournament* (TGT) berbantuan media game edukasi terhadap hasil belajar siswa, dengan nilai  $t_{hitung} = 3,487$  dan  $t_{tabel} = 2,042$  sehingga  $t_{hitung} > t_{tabel}$  dan hipotesis alternatif diterima.

**ABSTRACT**

*This study belongs to the pre-experimental research type which aims to determine the effect of the cooperative learning model of the Team Games Tournament (TGT) type assisted by educational game media on students' learning outcomes in the IPAS subject on the Solar System material for class V UPT SPF SD Negeri 101801 Kedai Durian in the Academic Year 2025/2026. This study employed a one group pretest-posttest design with a sample of 32 fifth-grade students. Before the treatment was given, students were first administered a pretest to determine their initial abilities. Subsequently, students were taught using the cooperative learning model of the Team Games Tournament (TGT) type assisted by educational game media. After the treatment was administered, students took a posttest to determine their final learning outcomes. Based on the treatment results, the average student learning outcome before the treatment was 58.31 and increased to 77.12 after the treatment. The learning outcome data were analyzed using a normality test as a prerequisite for analysis. The test results showed that the data were normally distributed, so hypothesis testing could be continued using the t-test (Paired Samples T-Test). The results of hypothesis testing indicated that there was a significant effect of the cooperative learning model of the Team Games Tournament (TGT) type assisted by educational game media on students' learning outcomes, with a value of  $t_{count} = 3.487$  and  $t_{table} = 2.042$ , so that  $t_{count} > t_{table}$  and the alternative hypothesis was accepted.*
