

**PENGARUH MEDIA BONEKA TANGAN TERHADAP  
KETERAMPILAN BERBICARA SISWA KELAS III  
SD SWASTA TUNAS SEBERNAMAN**

**ABSTRAK**

Penelitian ini bertujuan untuk mengetahui pengaruh media boneka tangan terhadap keterampilan berbicara siswa kelas III SD Swasta Tunas Sebernaman Tahun Pelajaran 2025/2026. Penelitian ini dilatar belakangi oleh rendahnya keterampilan berbicara siswa. Penelitian ini menggunakan metode Quasi eksperimen dengan kelas eksperimen dan kelas kontrol. Sampel penelitian berjumlah 40 siswa, yaitu kelas III A dan III B. Kelas eksperimen menggunakan media boneka tangan, sedangkan kelas kontrol tanpa menggunakan media. Penelitian ini dilaksanakan terhitung mulai 10 November sampai 14 November 2025. Hasil data awal menunjukkan rata-rata nilai kelas III A adalah 77,7 dan kelas III B adalah 67,5. Setelah perlakuan, hasil posttest meningkat menjadi 81,05 pada kelas III A dan 86,19 pada kelas III B. Uji hipotesis menghasilkan  $t$  hitung (2,48) >  $t$  tabel (2,02), menunjukkan  $H_0$  ditolak dan  $H_1$  diterima, sehingga terdapat pengaruh signifikan media boneka tangan terhadap keterampilan berbicara siswa. Kesimpulannya, media boneka tangan dalam meningkatkan keterampilan berbicara siswa kelas III SD Swasta Tunas Sebernaman.

**THE EFFECT OF HAND PUPPET MEDIA ON SPEAKING SKILLS  
OF THIRD-GRADE STUDENTS AT TUNAS SEBERNAMAN PRIVATE  
ELEMENTARY SCHOOL T.P 2025/2026**

**ABSTRACT**

*This study aims to determine the effect of hand puppet media on the speaking skills of third-grade students at SD Swasta Tunas Sebernaman in the 2025/2026 academic year. This research was motivated by the low speaking skills of students. The study used a quasi-experimental method with an experimental class and a control class. The research sample consisted of 40 students, namely class III A and III B. The experimental class used hand puppet media, while the control class used picture media. The study was conducted from November 10 to November 14, 2025. The initial data results showed that the average score of class III A was 77.7 and class III B was 67.5. After the treatment, the posttest results increased to 81.05 in class III A and 86.19 in class III B. The hypothesis test resulted in  $t$ -count (2.48) >  $t$ -table (2.02), indicating that  $H_0$  was rejected and  $H_1$  was accepted, meaning that there is a significant effect of hand puppet media on students' speaking skills. In conclusion, hand puppet media improves the speaking skills of third-grade students at SD Swasta Tunas Sebernaman.*
